The Corporation of the District
of Central Saanich

Dear Mayor Hunter and Members of Council:

RE: Water Task Force

The original Water Task Force was given 2 objectives:

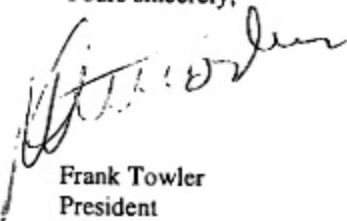

- 1) To provide an overall framework on matters concerning the use of water.
- 2) To use this framework to provide Council with recommendations for the resolution of the severe water problems being experienced by residents in the Mt. Newton X Road and Senanius Drive areas.

The Water Task Force did not succeed with either objective, even after it took many, many months to produce anything at all.

The CSWVA supported Council and the Task Force with an understanding that the Task Force would be focused, non-political and unbiased. This was not to be, as Council allowed the Task Force to be shanghaied by a known anarchist/eco-activist, opposed to any concept involving water mains.

Given the dismal results of the last Task Force, and the opposition by some Task Force members to the community's efforts to resolve it's serious water problems, the CSWVA does NOT support any consideration for the bringing to life this entirely useless and evil vehicle.

Yours sincerely,

Frank Towler
President
CSWVA
