March 29th, 2001

Dear Mayor Hunter and Members of Council:

Re: Urgent Health and Water Issue.

The CSWVA residents were very disappointed to see their health and water issue once again not addressed by Council. After over four and a half years of studies, reports, committees and task forces, we are surprised to find council still waiting for information.

This has become a very critical matter for the neighbourhood, water quality and quantity continues to deteriorate. Council needs to have the sense of urgency that is required of them in order to properly execute their public duty in a situation such as this.

We understand that this matter will be resolved, one way or another, at the committee meeting on April 9, 2001. The residents are requesting that Council show the community leadership desired, by approving the motion suggested in the letter of March 21, 2001 from Cox, Taylor.

Yours sincerely,

Frank Towler
President
CSWVA

c.c. Chairman Causton, CRD Board
