To Mayor and Council,
Central Saanich

I wish to withdraw my support for the Mount Newton water line proposal. It was my understanding that fire hydrants would be in place. Without such facilities I see no point in supporting the project. I also understand that there is some question as to the water in the line being contaminated because of the nature of the engineering. Before I can give my support I would like both these issues to be resolved.

Yours truly,

David A. Clark
