It is time for a change to a Council that will be open minded, compassionate, practical and fiscally responsible. We need a council that uses common sense in order to preserve our rural character and protect and support farms while serving the social and economic needs of the community.

We are now facing:

- Unaffordable housing
- A weakening and stagnant economic business base
- Higher taxes
- Erosion of property rights
- Depletion of the District of Central Saanich's financial reserve
- Draconian by-laws such as shutting off the water for any infractions including "illegal" secondary suites

Is there something seriously wrong with our Council when it incurs one of the highest annual legal bills in BC for a municipality of its size? Forcing Senanus Drive residents to rely on diesel tankers and large storage cisterns for their water supply further exposes the entire municipality to a potentially huge liability if a Walkerton type tragedy should occur.

This ad has been paid for by Central Saanich Citizens concerned with the erosion of basic rights and expanding bureaucratic control over our daily lives. We firmly believe that our future and that of our children depends on our return to a happier, more vibrant community in which we all work together to achieve our common goals.
