April 16, 2008

Dear Mayor Mar and Members of Council:

RE: Senanus Drive, Mt. Newton X Road Water Main Extension Project

The Federal and Provincial governments are providing 2/3rds of the funding of the cost of the water main extension in the amount \$1,126,666.00 and the remaining 1/3rd up to the estimated cost of \$1,690,000 plus any additional costs that may occur, are being funded 100% by the residents.

The municipality is not contributing any funding to the project. Therefore, the residents would appreciate the opportunity to provide some input into the design criteria and the tender documents that will be prepared for the project construction and for review by our engineer.

Residents are requesting that the design and tender documents include the two options listed below and that they be priced separately from the base price for the proposed minimum system. The attached document outlines the justification for this request.

This will provide us with accurate fixed prices for the options so that we can evaluate and determine the value of safety, peace of mind and future agricultural viability against the actual cost.

These options are in the order of priority as requested by the residents, the first being of wide interest and of particular concern:

1. Addition of Fire Hydrants. *(For safety and protection of families and property, peace of mind and significant insurance savings)*
2. Addition of a pumping station at an appropriate point, such as close to St Stephen's Road. *(to provide immediate increased flows)*

Please let us know if this request meets with your agreement or requires further discussion.

Yours sincerely,

Frank Towler
President
